SYSTEM - LIFT (Advanced solutions)

FRAMEWORK FOR OPERATION OF ESCALATORS Easy Escalator

OUR MISSION

We have launched an innovative range of electronic devices that have been able to meet the needs of demand, especially through a continuous research and development process.

Thanks to the best technologies available on the market, our products are designed to meet the needs and expectations of the customer

SYSTEM LIFT OPEN UP YOUR HORIZONS!

We present our system for escalators, complete with pre-wiring and including a new certified safety module: **Safety Icon**

SAFETY ICON SAFETY MODULE

EASY-ESCALATOR is compatible with Escalators and movable carpets with direct start, triangle star or inverter. Its Guarantees:

**SIMPLICITY
AUTOMATION
COMPETITIVENESS**

System Lift has developed its own safety module, consisting of two safety and diagnostic microprocessors (as far as SIL3).

**Fully certified
Competitive and easy
configure**

AUTOMATED TEST PROTOCOL ADJUSTMENTS

Easy-Escalator is designed for easy and as automated installation as possible.

Through the Easy-Pad digital keypad, the commissioning and adjustment procedures are designed for quick and easy execution.

Complete system of pre-cablation
The serial communication system between the panel and peripherals is based on the **PROFINET** protocol
